PROFILE

As a software developer with 8+ years of experience, I have specialized in the Laravel framework and also worked with JavaScript frameworks such as React.js for UI development and Express.js for server-side programming. I have developed mobile applications using Flutter and Riverpod for state management. My expertise extends to PHP, MySQL, Oracle, Livewire, JavaScript (frameworks), Bootstrap, WordPress, and Node.js. Additionally, I am skilled in automation testing with Python Selenium and coding Discord bots.

WORK EXPERIENCE

back-end dev 2024 JAN - PRESENT

back-end dev, Openpi, Switzerland

- codeIgniter back-end servicescompany's goals and objectives.
- Api Oauth flow .
- Api testing postman
